

QuickQualify is a web-based, pre-qualification solution that drives greater consumer engagement, and it provides a full credit profile and FICO score, without requiring a SSN or DOB.

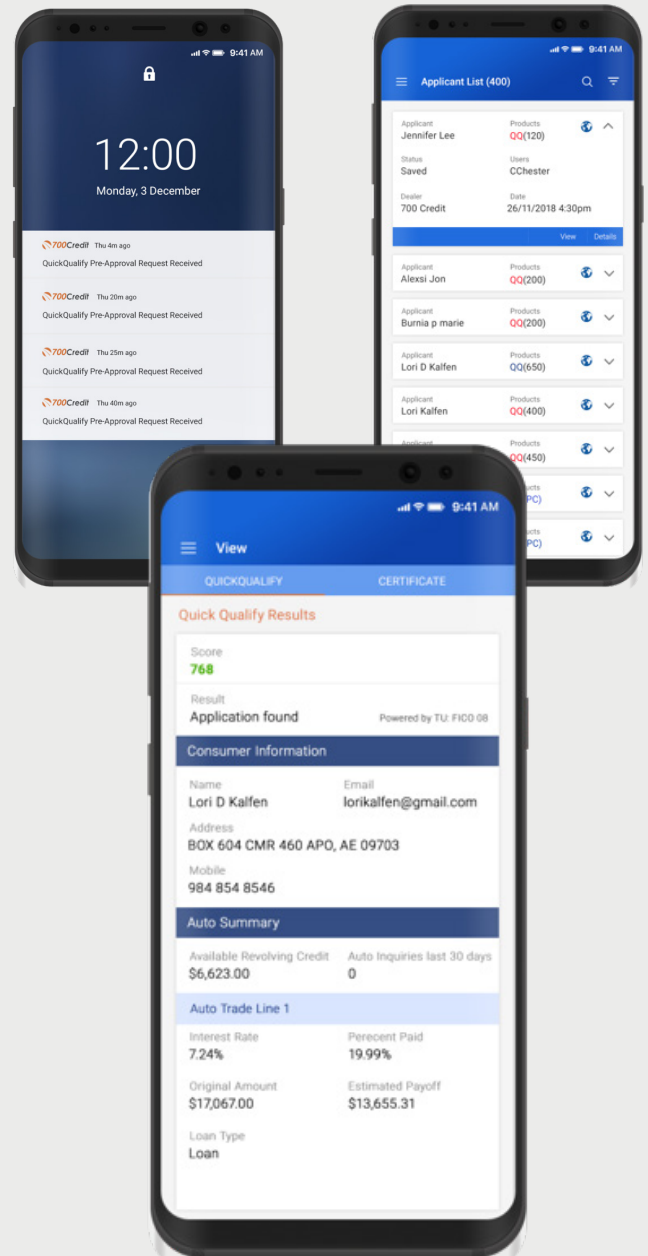

The Mobile Dealer App is specifically designed for easier management of a dealership's soft-pull leads generated by the QuickQualify solution. Dealers are immediately alerted when new leads are available, and can view their leads quickly and conveniently from their mobile device!

From this simple interface dealers can:

- » Receive alerts immediately to their phone when consumers complete the QuickQualify web form
- » Optimize interactions with consumers through text and mobile dialing
- » View all applicants and immediately click to view an applicant's credit score and credit file information
- » **Coming Soon!** Forward a dealership's **QuickQualify** URL via text or email to consumers to complete from their devices

The 700Credit Mobile Dealer App is available through the app store for both Android and iOS devices by searching for "700Credit". Each format includes a secure login screen for a safe and easy access to all your pre-qualified applicants.

Installing the app does require your correct email address or cell phone be setup on your account to verify your user id.

For more information or assistance with our QuickQualify Mobile App, please call (866) 273-3848.
