QuickScan / AutoRaptor

Verify a customer's driver's license and identity in minutes, before they step into the store.

QuickScan from 700Credit is a powerful mobile document scanner that provides dealerships real-time confirmation of the legitimacy of a customer's driver's license and identity. **Although it can be used in-store, it is particularly helpful when used to verify the identities of online car buyers.**

According to the FTC, retail businesses lose billions of dollars annually when fraudsters purchase or return goods by using counterfeit driver's licenses.

How it works:

1 Using a link sent by the dealer to a customer's mobile device, the customer is guided through the process of capturing their document and selfie

2 Facial recognition software checks the selfie against the image on the driver's license to determine a match

3 The driver's license is scanned and run through rigorous data and document recognition checks to determine its authenticity

4 The customer's mobile device is authenticated

5 Information obtained from the license is run against Identity Verification tools to find evidence of fraud

Stop Fraud in the Funnel
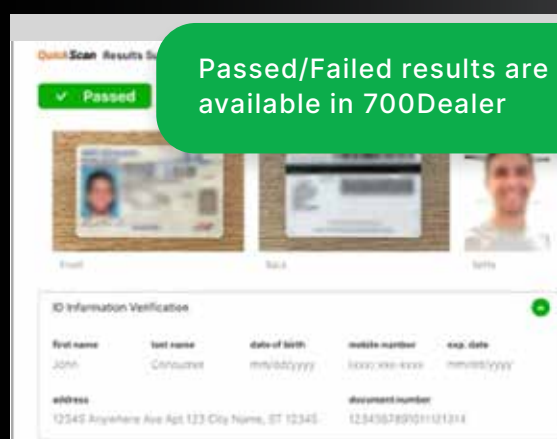

+ Driver's License/Document Verification

+ Selfie Verification/Liveliness Detection

+ Front/Back Driver's License Validation

+ Device Verification

+ Synthetic ID Fraud Detection

+ Identity Verification Check, Red Flags OFAC

Passed/Failed results are available in 700Dealer
