Soft Pulls

BENEFITS OF PREQUALIFYING CUSTOMERS IN YOUR TOYOTA PLATFORM

Soft pulls provide a quick and inexpensive way to prequalify a consumer for a vehicle without placing a hard inquiry on their credit file. They do not require an SSN or DOB, and they provide dealers with a FICO® Score and full credit file so accurate quotes can be made earlier in the sales cycle.

Toyota dealers receive immediate benefits by adding soft pulls into their process.

- Accuracy in the monthly payment quotes provided to the consumer by your digital retailing platform sets the proper expectations which is critical to completing the sale and removing friction in the finance office.
- The FICO® score and FULL CREDIT FILE you receive from Toyota's digital retailing platform is aligned exactly with your Finance Office's preferred Bureau and ScoreCard.
- There is no impact on a consumer's credit score when utilizing a soft pull, as no hard inquiry is placed on the file.
- Consumers that are prequalified early in the sales process are proven to generate a higher lead conversion rate than those that were not.

QuickQualify Bundled Pricing

Bundle Package	Bundle Cost	Experian / TransUnion / Equifax	
		Transactions in Bundle	Cost/Transaction Over

QuickScan

Verify a customer's driver's license and identity in minutes, <u>before they step</u> into the store.

QuickScan from 700Credit is a powerful mobile document scanner that provides dealerships real-time confirmation of the legitimacy of a customer's driver's license and identity.

Although it can be used in-store, it is particularly helpful when used to verify the identities of online car buyers.

According to the FTC, retail businesses lose billions of dollars annually when fraudsters purchase or return goods by using

counterfeit driver's licenses.

How it works:

- Using a link sent by the dealer to a customer's mobile device, the customer is guided through the process of capturing their document and selfie
- Facial recognition software checks the selfie against the image on the driver's license to determine a match
- The driver's license is scanned and run through rigorous data and document recognition checks to determine its authenticity
- The customer's mobile device is authenticated
- Information obtained from the license is run against Identity Verification tools to find evidence of fraud

Stop Fraud in the Funnel

- + Driver's License/Document Verification
- + Selfie Verification/Liveliness Detection
- + Front/Back Driver's License Validation
- + Device Verification
- + Synthetic ID Fraud Detection
- + Identity Verification Check, Red Flags OFAC
