Soft Pulls

The term “*soft pull*” refers to an action where a soft inquiry is made on a consumer's credit file using name and address only. Soft pull solutions **do not require a customer's SSN or DoB** and have **no impact on a customer's credit profile**. We have several soft pull solutions to choose from and help you engage consumers and speed the sales process, including:

QuickQualify (prequalification)

QuickQualify is a powerful “*call-to-action*” for your dealership website. This application requires only the consumer's name and address (*no SSN or DoB*) and provides dealers with a FICO® score and full credit report. Generate **3 to 4 times the leads** over a typical lead form and empower your sales team with the data they need to discuss qualified payment options.

QuickScreen (prescreen)

QuickScreen is a dealer-initiated soft pull solution that does not require a customer's SSN or DoB and does not impact their credit score. This solution can be integrated with many applications at your store, *giving you visibility into your customer's credit profile before you work a deal*, so you can work the right deal, right away.

Identity Verification & Fraud Detection

We are here to protect your store through our all-encompassing Identity Verification and Fraud Detection platform which includes the following solutions:

Identity Verification

Our platform is an automated solution that provides a summary table of results appended to each credit report. This vital service flags questionable information, focusing on high-risk applicants, social security numbers, driver's licenses and addresses. The 700Credit Identity Verification platform includes; OFAC Terrorist Search, ID Match, Synthetic Fraud, Military Lending Act (MLA), ID Verification, Red Flag, and Out of Wallet Questions (OOW).

Synthetic ID Fraud

A solution that uses proprietary logic and unique combinations of available data, the high-risk fraud score looks at a consumer's credit behavior and credit relationships over time to uncover previously undetectable risks. Dealers are returned a risk score with score factors to help determine if a new customer application is likely associated with a synthetic identity.

Income & Employment Verification

Combining the power of Experian's Verify™ product with The Work Number® from Equifax® and gain a more accurate understanding of a customer's financial standing. Dealers can now reduce risk and expand their coverage, offering lending decisions to a broader spectrum of consumers.

Driver's License Authentication Solutions

Protect your store with the industry's most advanced data capture and driver's license authentication solutions for automotive retailers today. We have **two platforms** for dealer's to authenticate customers – *both remotely and in-store*.

Mobile Scanner

Our document authentication platform, QuickScan, provides dealerships real-time confirmation of the legitimacy of a customer's driver's license and identity. This platform can be used in-store, as well as remotely when verifying the identities of online car buyers and leads. **Includes DMV validation and Deal Jacket integration.**

In-Store

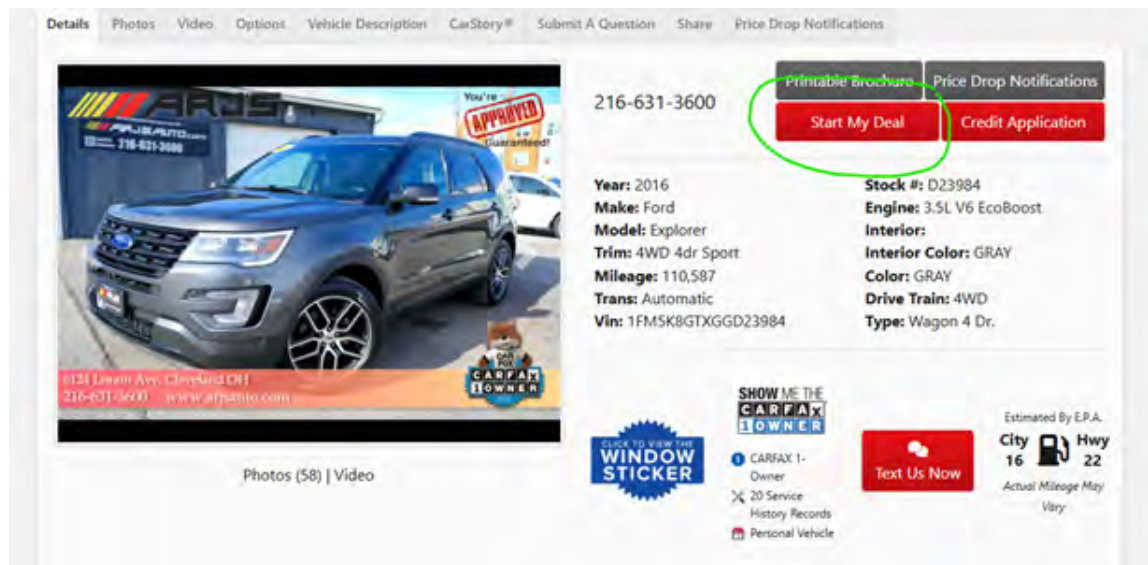

ID Drive provides dealers with the most comprehensive physical driver's license scanning solution for automotive dealers today. This platform combines our prescreen and prequalification platforms, as well as our suite of Identity Verification tools (*Red Flag and Synthetic Fraud detection*) to deliver fast, accurate results.

Dealer Car Search has integrated our soft pull, prequalification solution, QuickQualify, into their digital retailing plug-in tool, Payment Genie. This brief guide walks you through the consumer's experience getting prequalified with Payment Genie, and viewing lead information in the 700Dealer.com platform. If you have any questions, please feel free to reach out to our support desk at: (866) 273-3848 or email us at: support@700Credit.com.

Note: DCS’s Payment Genie back-end only supports providing the lead’s personal and vehicle/loan information and a prequalification “pass/fail”. To view their detailed prequalification report and credit score, dealers must use the 700Dealer.com portal.

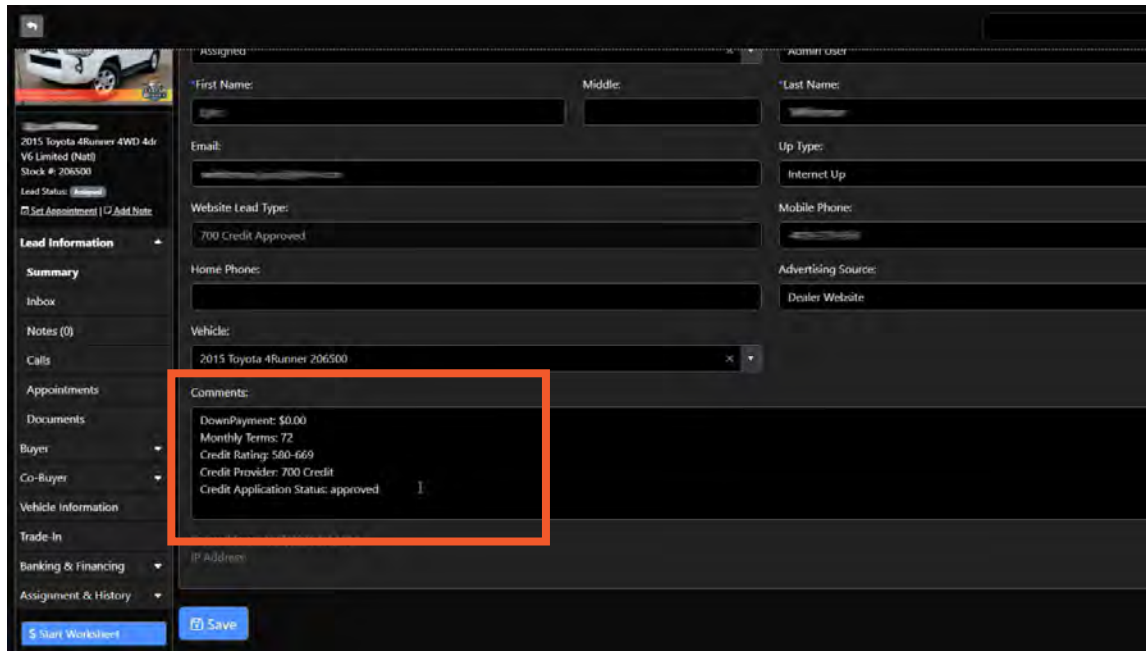

The dealer is provided a mass list of all leads in the system.

Under the **“Website Lead Type”**, they can determine a 700Credit prequalification lead by the label **“700 Credit Approved”** (customer’s soft pull returned a score at or higher than the dealer’s threshold setup) or **“700 Credit Denied”** (customer’s soft pull returned a score lower than the threshold).
