Driver's License Capture & Verification Inside of RouteOne with QuickScan

QuickScan isn't about adding another step to your sales process.
It's about replacing an outdated step with a safer, faster one.

Verify Identity | Identify Fraud Earlier | Securely Store Customer PII

How are you handling consumer's driver's licenses today?

Stop making photocopies of Driver's Licenses and be in danger of violating the consumer information protection act. With the RouteOne integration, driver's license images can be stored in RouteOne Deal Jacket or a Deal Jacket of your choice.

1

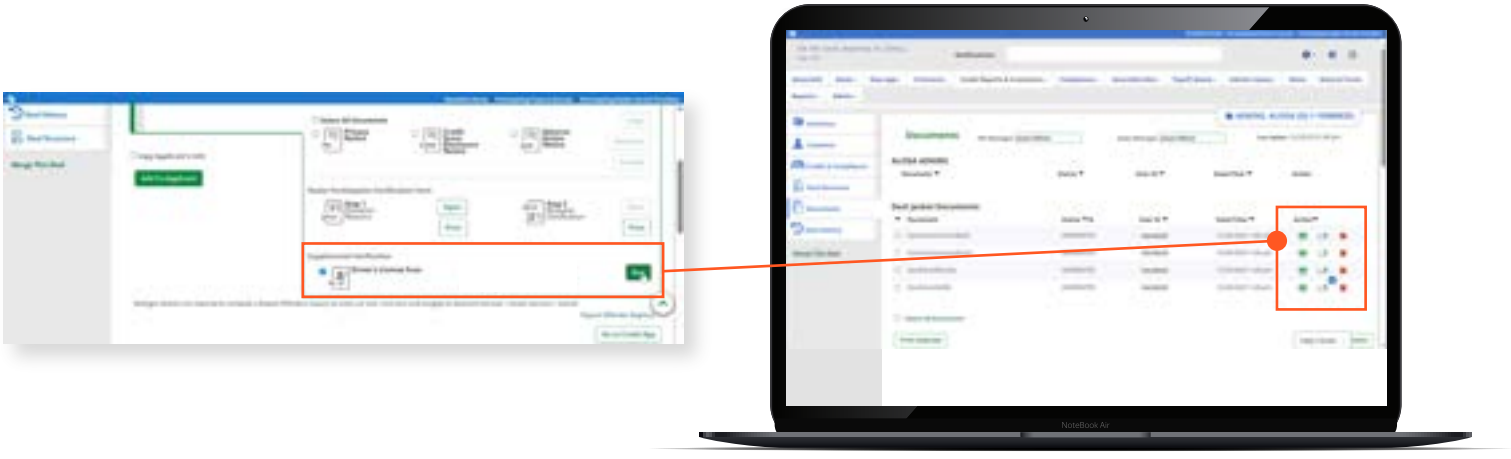

VERIFY IDENTITY
Authenticate the driver's license and identity, with document validation and identity verification.

2

DETECT FRAUD EARLIER
Use QuickScan before the test drive and add selfie/liveness and DMV verification as additional validation points.

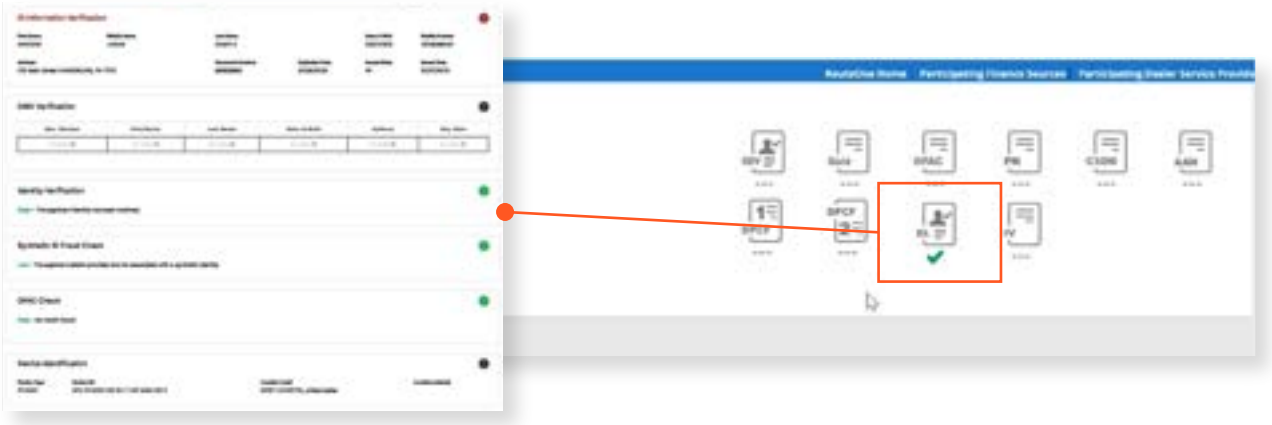

3

AUTOMATE THE DEAL JACKET
Authenticated license images and verification results are automatically saved into the RouteOne Deal Jacket.

QUICKSCAN CAPABILITY	What It Does	Dealer Value
DRIVER'S LICENSE AUTHENTICATION	Validate the license and identity—not simply capture a picture. Results are viewable within RouteOne.	Another layer of protection against identity fraud before a vehicle, customer information, or deal is at risk.
REMOTE + IN-STORE	Send a QuickScan link to the consumer's mobile device from RouteOne or let them initiate the scan using a QR code.	Consistent verification for remote and in-store customers while the dealer keeps working in RouteOne.
SELFIE / LIVELINESS	Use biometrics and liveness verification to compare the consumer's image with the driver's license.	A second validation tool to help identify suspicious transactions.
DMV VERIFICATION	Live DMV integration verifies name, address, DOB and driver's license number against the state DMV database.	An additional verification point that the license information matches DMV records.
DEAL JACKET INTEGRATION	Authenticated license images and verification results are automatically saved into the RouteOne Deal Jacket.	Eliminate manual scanning, photocopying, uploading and paper-jacket handling.
PROTECT CUSTOMER NPI	Securely capture and store customer identification without relying on manual license handling.	Help protect dealership and customer information while reducing manual handling of sensitive documents.

Are you ready to replace the old license-capture process?

Ask us to show you QuickScan in action within RouteOne.
